Receipts, Refund Slips aur Automatic Documents

HMS · Billing aur Documents · ye kaise kaam karta hai, aur kaunsa button kahan aata hai · 30 September 2026

Ek line mein: har bill ka apna number hota hai, har payment ki apni receipt, har refund ki apni refund slip. Ye sab ek Print button se ban sakte hain, ya aapke banaye niyam (rule) se apne aap. Jo bhi document banta hai, woh patient ke record mein **Files & Documents** ke andar save hota hai.

1. Kaunse documents bante hain
2. Numbers kaise bante hain
3. Receipt aur refund slip par kya chhapta hai
4. Buttons kahan aate hain
5. Payment lene ka poora flow
6. Automatic documents kaise kaam karte hain
7. Ek copy ka niyam (duplicate nahi)
8. Kisko kya dikhta hai (permissions)
9. Dikkat aaye to
10. Developers ke liye

1. Kaunse documents bante hain

Document	Kis cheez ka	Number (example)	Kagaz	Kaise banta hai
Clinic invoice	Poora bill: consultation, test, procedure	`GGN/INV/26-27/00001`	A4	Print button, ya rule se
Clinic payment receipt	Sirf **ek payment**. Do kishton (instalments) mein diya gaya bill = do receipts.	`GGN/RCP/26-27/00001`	A4	Receipt button, ya rule se
Clinic refund receipt (refund slip)	Sirf **ek refund**, yaani paisa wapas diya	`GGN/RFD/26-27/00001`	A4	Refund slip button, ya rule se
Prescription	Doctor ka issue kiya hua parcha	Prescription ka number	A5	Rule se (Prescription issued)
Pharmacy invoice / **Payment receipt**	Pharmacy counter ki sale	Sale ka number	A5 / 80mm	Rule se (Pharmacy sale completed)

Pharmacy ki "Payment receipt" aur clinic ki "Clinic payment receipt" alag cheezein hain. Pehli pharmacy sale ki till-slip hai, doosri clinic bill ke ek payment ki receipt.

2. Numbers kaise bante hain

Hissa	Example	Matlab
Branch code	`GGN`	Branch ka code, jaise Gurgaon = GGN, Delhi = DEL. Har branch ki apni series.
Document	`INV / RCP / RFD`	INV = invoice, RCP = payment receipt, RFD = refund
Financial year	`26-27`	April 2026 se March 2027. **Har 1 April ko counting 1 se dobara shuru.**
Kram (sequence)	`00001`	Us branch, us document aur us saal ka agla number

- **Number database deta hai**, bill ya payment save hote waqt. Koi staff khud number nahi daalta.
- **Beech mein number nahi chhootta.** Agar payment beech mein fail ho jaaye, to uska number wapas ho jaata hai aur agla payment wahi number leta hai.
- **Prefix badalna: Settings › Billing** › card **"Invoice & receipt numbers"**. Har branch ke Invoice, Receipt aur Refund ka prefix alag likh sakte hain, jaise `GGN/RCP` ki jagah `GUR-R`. Wahi card agla number bhi dikhata hai.
- Naya prefix **agle bill se** lagta hai. Jo number pehle chhap chuke hain, woh kabhi nahi badalte.
- Do branches ek jaisa prefix nahi rakh sakti, warna ek jaisa number ban sakta tha. System aisa save hone hi nahi deta.
- Purane invoices (jaise `INV-00042`) apne purane number ke saath hi rehte hain.

3. Receipt aur refund slip par kya chhapta hai

Clinic payment receipt (ek payment)

Hissa	Kya likha hota hai
Upar	**Receipt No** sabse pehle, phir Invoice No aur Date (payment ki tareekh aur samay)
Stamp	**PAID** agar is payment ke baad kuch baaki nahi; **PART PAID** agar abhi baaki hai
Patient details	Naam, Patient ID, umar/gender, mobile
Summary	Bill ka total. Agar kuch baaki hai to **"Balance due"**, **is payment ke turant baad** ka.
Payment information	Amount Paid (sirf is payment ka), Payment Mode, Transaction Ref., Paid On, Amount in Words, aur QR code jismein receipt number hota hai
Neeche	"Received by" (jis staff ne paisa liya) aur "Authorised signature" ke box

Reprint par bhi same: pehli kisht ki receipt agle hafte dobara chhapo, to bhi wahi amount aur wahi "Balance due" aata hai jo us din patient ko diya gaya tha. Baad ki payments usmein nahi judti.

Clinic refund receipt (refund slip)

Hissa	Kya likha hota hai
Upar	**Refund No** sabse pehle, phir Invoice No aur Date
Stamp	**REFUNDED**, ye raqam aapko wapas di gayi
Refund information	Amount Refunded, Refund Mode, **Against Receipt** (kis receipt ka paisa wapas hua), Reason, Refunded On, Amount in Words
Neeche	"Refunded by" aur "Authorised signature"

Refund slip par "Balance due" jaan-boojhkar nahi chhapta. Refund bill ko credit karta hai — jo paisa wapas diya, woh dobara maanga nahi jaata, isliye refund se bill ka baaki nahi badhta. Slip par "Balance due" sirf patient ko uljhata ki use abhi aur paise dene hain. (Poori jaankari: guide "Billing: Har Department ka Apna Bill".)

4. Buttons kahan aate hain

Print wale sabhi buttons tabhi dikhte hain jab user ke paas **"Print documents from a template"** (`documents.generate`) permission ho aur **Documents** module chalu ho.

Button	Kya hota hai / kab dikhta hai
Billing › Overview (Billing Dashboard, Recent invoices ki list)	
Print invoice (printer icon)	Us bill ka PDF khulta hai. Draft ya cancelled bill par nahi dikhta.
Take payment (cash icon)	Payment ki window khulti hai (section 5 dekhiye)
Billing › Invoices (har bill ki row mein)	
Take payment	Sirf tab jab bill final ho aur kuch baaki ho
Print invoice (printer icon)	Bill ka PDF
Close bill	Draft bill ko final karta hai; iske baad hi payment li ja sakti hai
Billing › Outstanding	
Take payment	Jin bills par paisa baaki hai, unki list se seedha payment
Billing › Payments	
(koi print button nahi)	Har payment ka number **Receipt #** column mein dikhta hai
Invoice detail page (Billing › Invoices › kisi bill par click)	

Button	Kya hota hai / kab dikhta hai
Print (upar)	Bill ka PDF, hamesha abhi ki haalat ke saath (PAID / PART PAID / UNPAID)
Take payment (upar)	Payment ki window
Receipt Payments card, har payment ke saamne	**Us ek payment ki receipt** (A4, ek page). Receipt number payment ke neeche likha hota hai.
Refund slip Payments card, har refund row (↩ nishaan wali) ke saamne	Us refund ki slip (A4, ek page)
Refund Payments card, payment ke saamne	Paisa wapas karne ki window: amount aur reason. Sirf `billing.refund` wale users ko dikhta hai.
"Take payment" window (upar ki kisi bhi screen se)	
Print bill (neeche baayein)	Payment lene se pehle patient ko bill dikhane ke liye
Record payment	Payment save hoti hai, number milta hai, aur **"Payment recorded"** window khulti hai
Print receipt "Payment recorded" window mein	Abhi li gayi payment ki receipt, jab patient saamne khada ho. Window mein Received, Mode, Receipt no. aur Still owed dikhte hain.
Patient page › Files & Documents	
Open / Download / Remove	Patient ke saare bane hue documents, chahe haath se print kiye gaye hon ya rule se bane hon. Remove karne se document chhup jaata hai, mitta nahi (reason ke saath).
OPD › Consultation › Documents tab	
Open / Download	Wahi documents, is visit ke context mein

Settings ki screens

Screen	Kya karte hain	Permission
Settings › Billing	Card "Invoice & receipt numbers": har branch ke prefix, aur agla number	`billing.manage_settings`
Settings › Document templates	Har document ka letterhead aur design, jismein "Clinic payment receipt" aur "Clinic refund receipt" bhi hain. Publish kiya hua template hi print hota hai.	`documents.template_view`
Settings › Automatic documents	Kaunsa document apne aap bane (section 6)	`documents.template_org`

5. Payment lene ka poora flow

1	Bill final hai (draft nahi). **Take payment** dabaiye: Invoice page, Invoices list, Outstanding ya Overview, kahin se bhi.
2	Window mein patient, bill total, pehle diya gaya aur **Outstanding** dikhta hai. Method (Cash, UPI, Card...), amount aur reference (UPI txn id wagairah) bhariye.
3	**Record payment** dabaiye. Payment save hoti hai aur database use receipt number deta hai, jaise `GGN/RCP/26-27/00007`.
4	**"Payment recorded"** window khulti hai: kitna mila, mode, receipt no., kitna baaki. Yahan **Print receipt** dabaiye, ya **Done**.
5	Agar clinic ne rule lagaya hai ("Payment received → Clinic payment receipt"), to receipt step 3 ke saath hi **apne aap ban chuki hoti hai**. Print receipt dabane par wahi copy khulti hai, nayi nahi banti.
6	Receipt patient ke **Files & Documents** mein save ho jaati hai. Baad mein Invoice page ke Payments card mein **Receipt** button se dobara bhi chhap sakti hai.

Refund ka flow

1	Invoice page › Payments card › payment ke saamne **Refund** dabaiye.
2	Kitna wapas dena hai aur reason likhiye → **Refund**. Payment se zyada refund nahi ho sakta.
3	Refund ki nayi row (↩ nishaan ke saath) aati hai aur use RFD number milta hai, jaise `GGN/RFD/26-27/00001`.
4	Us row par **Refund slip** dabaiye, ya rule ho to slip apne aap ban chuki hoti hai.

6. Automatic documents kaise kaam karte hain

Settings › Automatic documents par clinic tay karta hai: **"jab ye ho, to ye document apne aap bana do."**

Screen kaise use karein

1. Daayein **"Applies to"** mein chuniye: **All branches** ya koi ek branch.
2. Baayein har module (Billing, Prescriptions, Pharmacy) ka card hai. Har row ek event hai, jaise "Payment received", aur usmein jo documents ban sakte hain unke checkbox hain.
3. Tick lagaiye aur upar **Save** dabaiye. Save sirf usi scope (All branches ya woh branch) ke niyam badalta hai.
4. Kisi branch ko chunne par "All branches" wale niyam ticked aur grey dikhte hain, saath mein **All branches** badge. Unhe wahan se nahi hata sakte; hatane ke liye "All branches" chuniye. Branch apne alag niyam jod sakti hai.
5. Bina save kiye branch badlenge to system poochta hai: "Discard unsaved changes?"

Kis event par kya ban sakta hai

Event (jab ye ho)	Ban sakta hai	Module
Invoice created (bill final hua)	Clinic invoice	Billing
Payment received (har payment par)	Clinic payment receipt, Clinic invoice	Billing
Payment received, balance outstanding (kuch baaki hai)	Clinic payment receipt, Clinic invoice	Billing
Invoice settled in full (poora bill chuk gaya)	Clinic payment receipt, Clinic invoice	Billing
Refund processed	Clinic refund receipt	Billing
Prescription issued	Prescription	Prescriptions
Pharmacy sale completed	Pharmacy invoice, Payment receipt	Pharmacy

Screen par wahi events dikhte hain jinka module aapki organisation mein chalu hai. Galat jodi (jaise payment par prescription) na screen par milti hai, na server save karta hai.

Andar kya hota hai

1	Staff payment save karta hai. **Payment database mein pakka (commit) hone ke baad hi** event uthta hai. Agar payment fail ya rollback hua, to koi event nahi aur koi receipt nahi.
2	System dekhta hai ki is event ke liye kaunse niyam hain: "All branches" wale, aur jis branch par payment hui uske apne.
3	Jaanch hoti hai ki us branch par Documents module (aur document ka module) chalu hai. Band hai to kuch nahi banta.
4	Document branch ke **published template** se banta hai aur patient ke Files & Documents mein file hota hai.
5	Kuch galat ho jaaye (template publish nahi, patient nahi) to **payment phir bhi safe rehti hai**. Receptionist ko "payment fail" nahi dikhta; galti sirf log mein jaati hai.

Abhi nahi hai: WhatsApp ya email se document patient ko bhejna. Documents sirf bante aur record mein file hote hain. Isliye screen par bhejne ka koi switch bhi nahi rakha gaya.

7. Ek copy ka niyam (duplicate nahi banta)

Halaat	Kya hota hai
"Payment received" aur "Invoice settled in full" dono par receipt tick hai	Poora bill chukane wali payment par dono event uthte hain, lekin **receipt ek hi** banti hai
Wahi niyam "All branches" aur branch, dono par laga hai	Ek hi copy
Event dobara aa gaya (retry, double click)	Nayi copy nahi banti
Rule se bani receipt kisi ne Remove kar di	Event dobara aane par **wapas nahi banti**, kyunki kisi ne jaan-boojhkar hatayi thi
Bill (Clinic invoice) ka rule "Payment received" par	**Har payment par bill ki nayi copy**, kyunki bill badalta hai (UNPAID → PART PAID → PAID)
Receipt rule se ban chuki hai aur koi **Print receipt** / **Receipt** dabata hai	**Wahi copy khulti hai**, doosri file nahi hoti. Ek payment ki do receipts dekhkar do payment ka bhram hota.
Bill ka **Print** dabaya	Hamesha bill ki abhi ki haalat ke saath naya bill
Rule se bani copy Remove ho chuki hai aur Print dabaya	Nayi copy banti hai
Koi rule nahi, Print do baar dabaya	Do copies (pehle jaisa: har Print ek nayi copy)

8. Kisko kya dikhta hai (permissions)

Kaam	Permission	Note
Koi bhi Print / Receipt / Refund slip button	`documents.generate`	Documents module chalu hona chahiye
Take payment	`billing.collect_payment`	
Refund	`billing.refund`	
Bane hue bill/receipt kholna	`documents.view`	Billing ke documents "administrative" category mein aate hain
Prescription jaise medical documents kholna	`documents.view_clinical`	
Document remove karna	`documents.delete`	Reason ke saath; mitta nahi
Numbering prefixes badalna	`billing.manage_settings`	Organisation level

Templates dekhna / badalna / publish	`documents.template_view / _edit / _publish`	Branch level
Automatic documents ke niyam	`documents.template_org`	Sirf owner / org admin; branch role ko nahi mil sakta

9. Dikkat aaye to

Kya dikha	Kya karein
"No active template for this document. Publish one before printing."	**Settings › Document templates** mein us document ka template **Publish** kariye. Naye clinic ko receipt aur refund ke templates pehle se published milte hain.
"This record has no patient on it..."	Bina patient ka (walk-in) bill kisi record mein file nahi ho sakta. Pehle bill par patient jodiye.
Error: `relation "number_series" / "document_rules" does not exist`	Naya database update chalana baaki hai. Server par: `php artisan tenants:migrate`. Ye har clinic ka database update karta hai; sirf `php artisan migrate` kaafi nahi hai.
Rule lagaya par receipt nahi bani	Jaanchiye: (1) niyam sahi scope par save hua? (2) us branch par Documents module chalu hai? (3) template published hai? (4) bill par patient hai? Log mein `document-automation.*` lines dekhiye.
Print button nahi dikh raha	User ke paas `documents.generate` hai? Bill draft ya cancelled to nahi?
Refund slip par Balance due nahi	Jaan-boojhkar aisa hai (section 3 dekhiye)
Receipt button refund row par nahi, Refund slip payment row par nahi	Sahi hai. Paisa aana aur paisa wapas jaana alag kagaz hain; system ek ko doosre ke naam se chhapne hi nahi deta.

10. Developers ke liye

Hissa	Files

Numbering	`database/migrations/organization/`
	`  2026_10_15_000000_number_invoices_and_receipts_by_branch.php`
	`app/Services/Billing/BranchNumbering.php`
	`app/Http/Controllers/Api/V1/Tenant/BillingNumberingController.php`

Clinic events	`app/Support/Clinic/ClinicEvents.php (events + kaunse documents)`
	`app/Services/Clinic/ClinicEvent.php`
	`app/Services/Clinic/ClinicEventDispatcher.php (after-commit, tenant guard)`

Automation	`app/Services/Documents/DocumentAutomation.php`
	`app/Services/Documents/DocumentRules.php`
	`app/Services/Documents/DocumentSubjects.php`
	`app/Models/Tenant/DocumentRule.php`
	`database/migrations/organization/`
	`  2026_10_16_000000_create_document_rules.php`

Banana aur file karna	`app/Services/Documents/DocumentService.php (generate, filedAutomatically, recordKey)`
	`app/Services/Documents/DocumentPayload.php (fromPayment, fromRefund)`
	`app/Services/Documents/DocumentHtml.php`
	`app/Support/Documents/DocumentTypes.php, Placeholders.php`

API	`POST /api/v1/tenant/documents/generate`
	`GET | PUT /api/v1/tenant/document-rules`
	`GET | PUT /api/v1/tenant/billing/numbering`

Frontend	`resources/js/core/billing/components/PaymentDialog.tsx`
	`resources/js/core/billing/pages/InvoicePage.tsx`
	`resources/js/core/billing/pages/BillingSettingsPage.tsx`
	`resources/js/core/documents/pages/DocumentAutomationPage.tsx`

Tests	`tests/Feature/Api/V1/Tenant/ClinicEventTest.php` `BranchNumberingTest.php · ClinicReceiptTest.php · DocumentRulesTest.php`

Kuch zaroori baatein

- **Duplicate rokne wali key** `patient_documents.idempotency_key` hai, record par bani: `clinic_receipt|App\Models\Tenant\InvoicePayment#42`. Bill ke liye isme payment ya refund id bhi judti hai. Unique index hataye gaye documents par bhi lagta hai.
- **Queue nahi:** document usi request mein, commit ke baad banta hai. Isliye `queue:work` ki zaroorat nahi.
- **Tenant safety:** event us database ka naam saath rakhta hai jismein woh bana tha. Connection badal gaya ho to dispatcher use chalata hi nahi.
- **Niyam ki table mein "enabled" column nahi hai**, row hona hi haan hai. `location_id` null ka matlab sabhi branches.
- Nayi tenant migration aaye to hamesha `php artisan tenants:migrate` chalaiye. Ye naye document templates bhi seed karta hai.
